1	Attorney Docket No. 80116
2	
3	ACOUSTIC REMOTE CAVITATION AS A DESTRUCTION DEVICE
4	
5	ABSTRACT OF THE DISCLOSURE
6	A method is disclosed of generating a predetermined field
7	of cavitation around a remote target in an underwater
8	environment. The method includes the steps of identifying a
9	remote target location, generating at least two acoustic
10	beamforms, each at a high power output, from an underwater
11	acoustic source, and controlling the generated acoustic
12	beamforms to intersect with each other at the remote target
13	location and thereby create a destructive cavitation field at
14	the intersection of the beamforms. The acoustic source and
15	target can be located in unconfined underwater space and at a
16	distance of at least 100m apart.
